**Object: Brass Announcement**

Dear customer,

Due to strong demand for non-potable water applications, BMI continues to offer a broad offering of regular brass fittings (Cat 03) as well as a full line of lead free brass fittings (Cat 06).

Attached you will find a new price sheet for regular brass that shows the items that BMI will continue to carry in the foreseeable future. We have also added items that are still available from stock; while quantities last. These are highlighted in **RED**.

We trust this information will bring clarity to this situation and will be helpful to you in making your buying decisions.

Thank you for your continued support.

Best regards,

Mike Lavoie

Vice-president – Business Development
