Object: Price Increase Notice

Dear valued customer,

The fluctuations in Canadian currency is having a severe impact on our costs. Consequently, we have no choice but to increase our prices accordingly.

Some items such as copper fittings and brass items are not so severely affected since the reduction in copper prices is somewhat offsetting this increase.

The following price increases will apply **over and above our price adjustments** announced this past January 18th and will be incorporated as one price change **now effective March 21st 2016**.

- Brass Fittings, Nipples and Pipes; Cat 03, 04, 06 and 24: +11%
- All Copper Fittings; Cat 21, 22, 25 and 37: +11%
- Brass PEX Fittings; Cat 34 and 39: +11%
- All Valves, Chrome Stops, Wall Hydrants, Water Hammer Arrestors, and Lead Safe Push-Fits; Cat 09, 13, 14, 27, 31 and 38: +14%
- Poly-Alloy PEX Fittings; Cat 30: +7%
- Dielectric Unions, General Plumbing and MJ Couplings; Cat 07, 08, 28 and 18: +17%
- Steel Nipples, Malleable Fittings, and Wrot Steel Couplings and Cast Iron Fittings and Flanges; Cat 10, 11, 12, 20, 35, 36, 41, 15 and 16: + 17%

Prices on remaining inventory of leaded Push-Fit Fittings and PVC Valves are not being increased.

Attached you will find links to our new price sheets which you may retrieve in either PDF or Excel formats.

BMI reserves the right to limit purchases to no more than 1 1/2th of your past purchases in any given category.

We thank you for your continued support. Please contact your BMI representative should you have any questions.

Best regards,

Mike Lavoie
Vice-president – Business Development
