CERTIFICATE OF COMPLIANCE – COPPER FITTINGS

This is to certify that BMI Canada Inc., located in Boisbriand, Quebec, imports its Cast/Forged Brass and Wrought Copper Solder Joint Fittings according to the general specifications outlined in the following industry standards:

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> ❑ ASME/ANSI B16.18 - 1984 ❑ ASME/ANSI B16.22 - 1989 ❑ ASME/ANSI B16.23 - 1992 ❑ ASME/ANSI B16.29 - 1986
 ❑ MSS SP-104 ❑ MSS SP-106 | <ul style="list-style-type: none"> Cast/Forge Copper Alloy Solder Joint Pressure Fittings Wrought Copper Joint Pressure Fittings Cast Copper Alloy Solder Joint Drainage Fittings – DWV Wrought Copper and Wrought Copper Alloy Solder Joint Drainage Fittings – DWV Wrought Copper LW Solder Joint Pressure Fittings Cast Copper Alloy Flanges and Flanged Fittings Class 125, 150 and 300 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Furthermore, the materials used to manufacture these fittings are made in compliance with the following industry standards:

Cast Products:

- | | |
|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> ❑ ASTM B584 Alloy C84400
 ❑ ASTM B584 Alloy C85700 | <ul style="list-style-type: none"> Standard Specification for Copper Alloy Sand Casting for General Applications: Federal Specification WW-U-516 for Type III, Class A and B Copper Alloy Unions. Leaded Naval Brass, for forged brass fittings (Bar Stock fittings) |
|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The industry standards are: ANSI (American National Standards Institute); ASME (The American Society of Mechanical Engineers); MSS (Manufacturers Standardisation Society of the Valve and Fittings Industry Inc.); ASTM (American Society for Testing and Materials).
